

# SYMPÉRA

## *acoustielectric Chamber-Rock*

On January 26, 2018 Sympéra's debut album with the title „**After 20 Years of Travelling**“ will be released by recordJET. It contains nine songs and is available online in all major stores. The booklet to the album is available for free download on [sympera.de](http://sympera.de). Physical distribution is being considered.

At the same time, the video produced by Norbert Strauß for the song „Lighthouse“ will be online. The title of the album is program, here twenty years of rock trio are musically processed in a new way.

**SYMPÉRA** is the solo project launched in 2016 of the Gelsenkirchen guitarist and composer Norbert Strauß. It combines rock music and singer-songwriter tradition with digital technology. What can be done acoustically is made acoustically – with hands, feet, voices..... What goes beyond that, the trained guitarist programs and takes over the processor. That the roots lie in rock is still audible in the chamber music arranged songs: Acoustielectric Chamber-Rock.

**SYMPÉRA** connects country 'n' western-picking with hip-hop, sometimes acoustic instruments with machine sounds. Sympéra sounds opulent at times like a large ensemble, sometimes very puristic: vocals, guitar, bass and cajon. „Every song gets the arrangement it needs,“ says Norbert Strauß. „After more than twenty years of rock trio I felt very limited in my musical expression. At Sympéra, many of my ideas can now be put into practice, for which I would actually need a larger line-up. The equal use of technical possibilities considerably expands my artistic freedom.“

**SYMPÉRA** is currently working on the second album and more videos.

Uschi Strauß contributes lead vocals, song lyrics and graphics. Since 1986, the two have been working together in changing band projects. They'll never give up.
